DETAILED ACTION

1. This is the initial Office action based on the 10/523649 application filed on July 29, 2005.
2. Claims 1-32 are pending and have been full considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, C18;3 fatty acids means a fatty acid having 18 carbon atoms and three un-saturation or double bonds (according to the specification). Clarification of independent claim 1 and the dependent claims with similar language is requested. No new matter may be added.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claims 1-32 relate to products such as a fatty acid composition providing improved low temperature stability which lacks a "paraffine dispergent" (should this be a paraffin dispersant?), but, since the claims do not set forth any steps in how this result is achieved, it is unclear what result the applicant is intending to encompass. A claim is indefinite where it merely recites functional language without any active, positive steps delimiting how this method is actually practiced. The claims are generally narrative and indefinite, failing to conform to current U.S. practice.

8. Claims 23-27 provides for the use of a fatty acid composition, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 23-27 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Objections

9. Claims 12-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only, and/or, cannot depend from any other multiple dependent claim, either directly or indirectly. See MPEP § 608.01(n).
